

Missing Air Crew Reports Index

SEPTEMBER 1945

This list of Missing Air Crew Reports was compiled mostly from an index created by the Army Air Forces in late 1945. The 1945 index provides the country or region of where an aircraft was observed to have been lost or where an aircraft was thought to have been lost. We have begun to review the individual reports and update the locations and other data, but it is still far from complete. The locations on the individual reports are most often vague, incomplete or outright wrong. It must be remembered that in most cases there were no friendly witnesses on the ground and that the location is often a guess based on available information. There is no doubt that many locations are incorrect and can not be corrected without significant research in the actual area of the crash. We invite anyone with corrections to contact us.

MACR NUMBER	DATE (YYMMDD)	PILOT	AIRCRAFT	SERIAL NUMBER	LOCATION
15396	450901	DEMERSE, RICHARD E	C-47	43-48893	ELMENDORF FIELD, AK
